ABOUT ME

I am a Bulgarian/American designer with a passion for Game Development and Manufacture, and I have a wide skill set because of it! I mainly focus on 3D Design, ranging from standard mesh modeling and voxel-art to CAD. I love 3D Printing and Laser-Cutting, and have a lot of experience in both. I am also a semi-experienced programmer in a variety of languages. I have many side hobbies as well that come in handy in my work, such as image and video editing, Web Design, music performance and production, and architecture.
